

How the Heck do I Connect to this Darn Thing?!

First things first...

We have to download the app

Go to the **"App Store"** or the **"Play Store"**,
(wherever you download your Apps)

Search for an app called **"Skydance"**.

Once **"Skydance"** is downloaded

DO NOT launch or open it yet!

Before Launching the App we must **connect to the Wi-Fi controller**, installed at your home.

So...

Go to your **settings**,

then to **Wi-Fi**

look for something called **"GlowStone"**

(there might be more numbers or letters before the name but **"GlowStone"** is the name of the device to connect to).

Connect to **"GlowStone"** and wait for the "Wi-Fi" symbol  to appear at the top of your phone.

It can take up to a minute for the Wi-Fi symbol  to appear at the top of your phone.

Once it does then we'll launch the app.

When you first launch **"Skydance"**, and if you've connected properly, within a few seconds you should see the Opening page.

Click on the word **"GlowStone"** to get into the app.
